

Multipurpose Dashboard Figma UI Kit

Documentation

- Document version: 5.0
 - Created: 09 March 2022
 - Last update: 25 April 2022
-

Frox is a clean and modern dashboard UI Kit targeting a wide variety of use cases for web and mobile applications in light and dark mode. With *135+ different premade screens / templates*, including many of components, symbols and elements you are able to create your own unique design for your next project. It's made from designers for designers and freelancers.

Designers, skip creating from scratch those boring web elements along with every dashboard. Use these templates to concentrate on important things, not on pixel routine.

Developers, this design library allows you to learn or enhance web design skills. Jump into a process, where you only need to drag and fit a block to build good-looking pages.

Managers & Owners, these templates are ready to be published for teams and provide an opportunity to quickstart massive prototyping immediately.
